NIKO- TROCARS

Auto-locking Trocar

(Hand pressed dynamic)

Bladeless Trocar

Visible Trocar

Secondary Trocar

Disposable Balloon Trocar (Hassan Trocar 5mm, 10mm, 12mm)

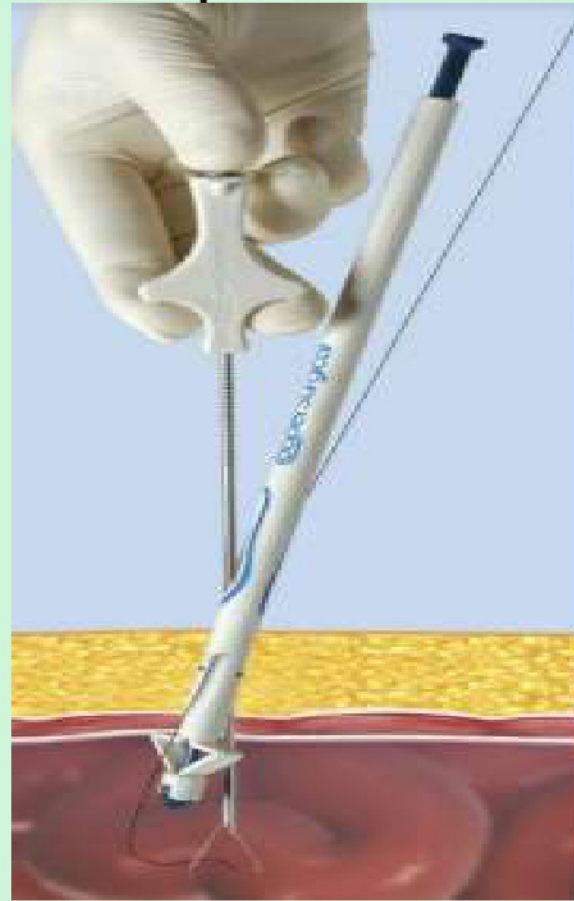

Disposable Trocar (Hasson)

- Durable universal seal, no reducer needed
- Recessed stopcock valve
- Unique fixing design
- Optical / blunt tip

Carter-Thomason II Port Site Closure System- Cooper Surgical

Safely and Quickly Close Laparoscopic Port Sites

The Carter-Thomason II Port Closure System is an intuitively useful surgical tool that enables precise, repeatable port site closure even in overweight and obese patients. The ease of use, ergonomically designed controls and upgraded construction all add up to safer, more efficient and reliable procedures.

Closing Multiple Port Sites Under Direct Visualization

SURGICAL RETRACTOR SYSTEM- LIKE LONE STAR

Retractor Rings for Exceptional Visibility and Access

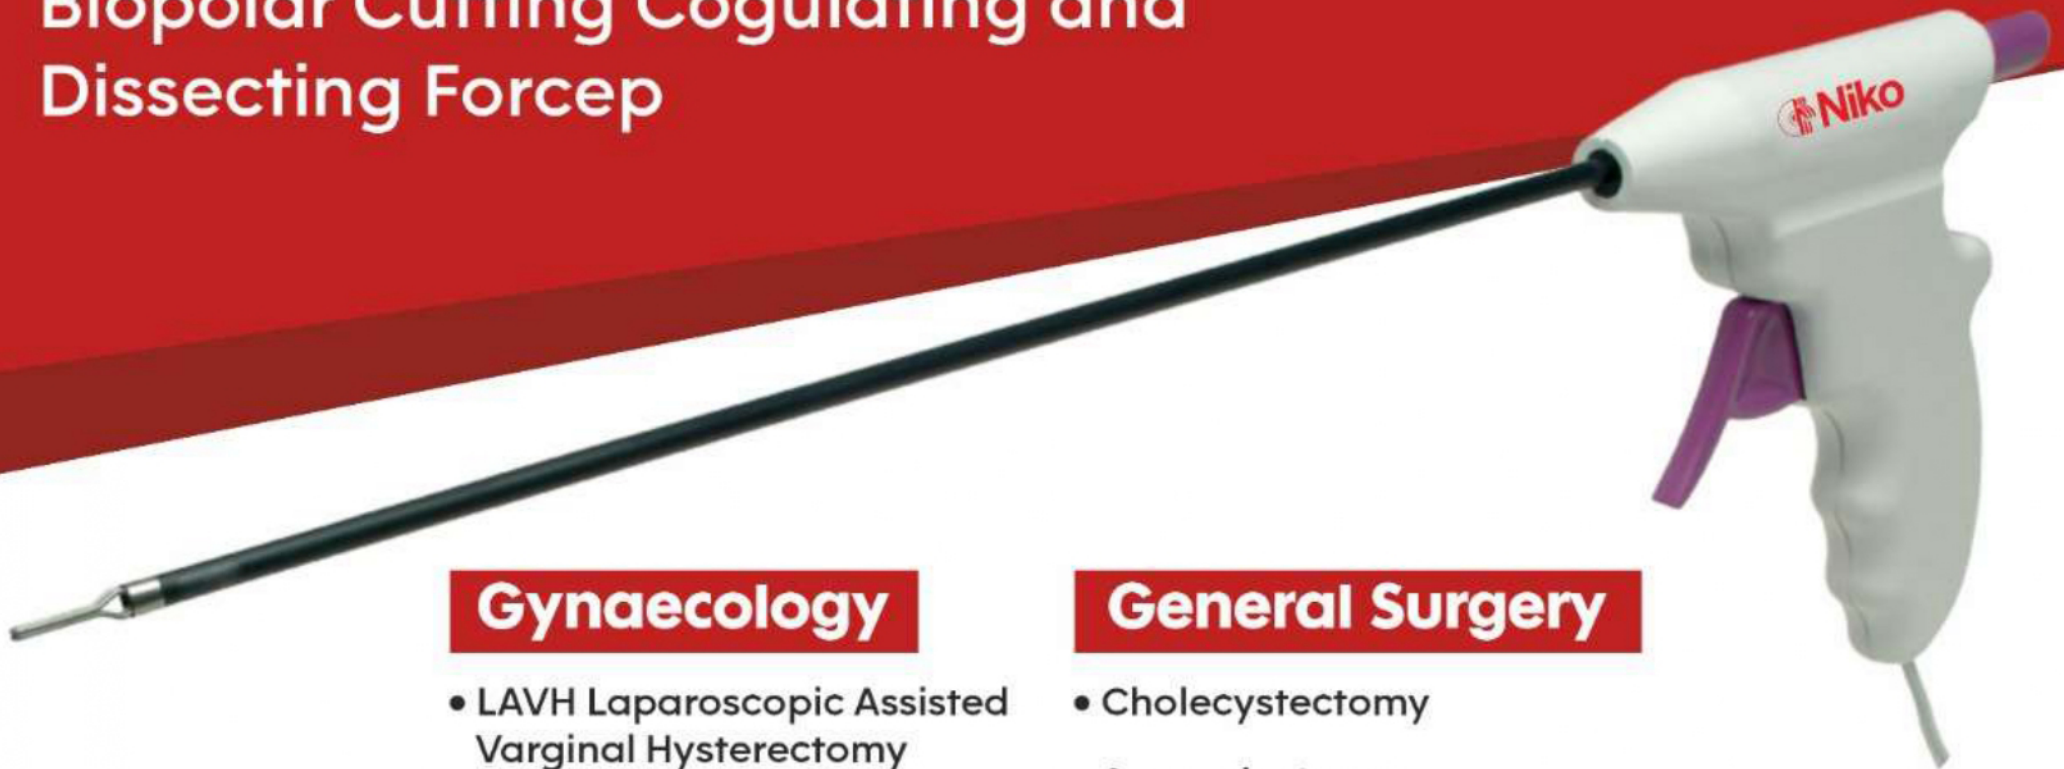

Lone Star's self-retaining retractor system offers superior visualization and efficiency for a wide range of surgical procedures. Lone Star retractors are available in a variety of shapes and sizes to match anatomy across many specialties. The lightweight retractor rings articulate to rapidly adjust to surgical needs on demand. Ultra-precise hook placements and elastic stays maintain consistent retraction and promote organized site management, freeing OR personnel for other tasks.

Gynaecology Kit: each kit contains one disposable retractor, Model #3304G, and one pack of eight 5 mm sharp stay hooks, Model #3311-8G (5/Box)- 3704

Colorectal Kit: each kit contains one disposable retractor ring, 14.1 cm x 14.1 cm, Model 3307G, and one pack of eight 5 mm sharp stay hooks, Model #3311-8G (5/Box)

NIKO TRISTAR

NIKO ANTI FOG SOLUTION

NIKO Anti Fog Solution is used to eliminate fog on endoscopes.

- One or two drops are sufficient.
- Specially formulated anti-fog solution will not damage the scope
- 3 ml bottle
- **Niko** Anti Fog Solution can be reused

NIKO CAMERA COVER

Easy to use

Secures tightly to camera head
Latex free

Gloves do not come in contact with adhesive

Tear resistant polyethylene ring

Covering all makes and brand of Video Camera

NIKO Veress Needle

- Big size spring-loaded stylet provides loud audible “click ” when passing through tissue layers.
- Visible red indicator of needle position.
- Sharp tip for easy insertion.
- High flow stopcock.
- Two sizes with 120/150 mm length are available.

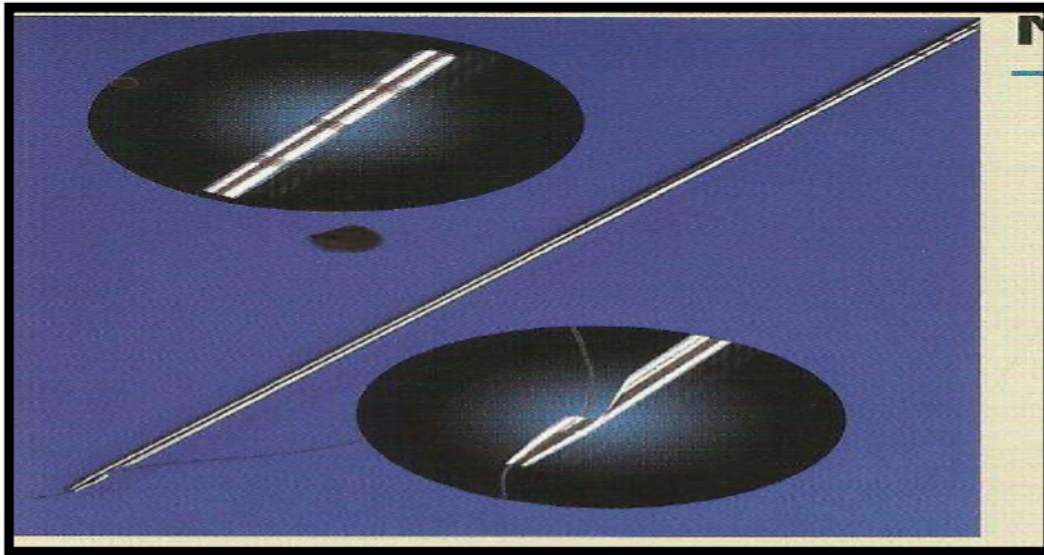

Proctoscope/ Anascope

with LED Lights Disposable - Because of the complications and high start up costs with a Cold light system together with the high probability of “Cross Infection” many new customers are now going over to LED disposable lighting.

1. Proctoscope with light Pediatric / Medium / Large
2. Proctoscope with Adapter Slot Pediatric / Medium / Large

KNOT PUSHER LIGATOR (REUSABLE)

Multipurpose Knot Pusher Ligator

Features:

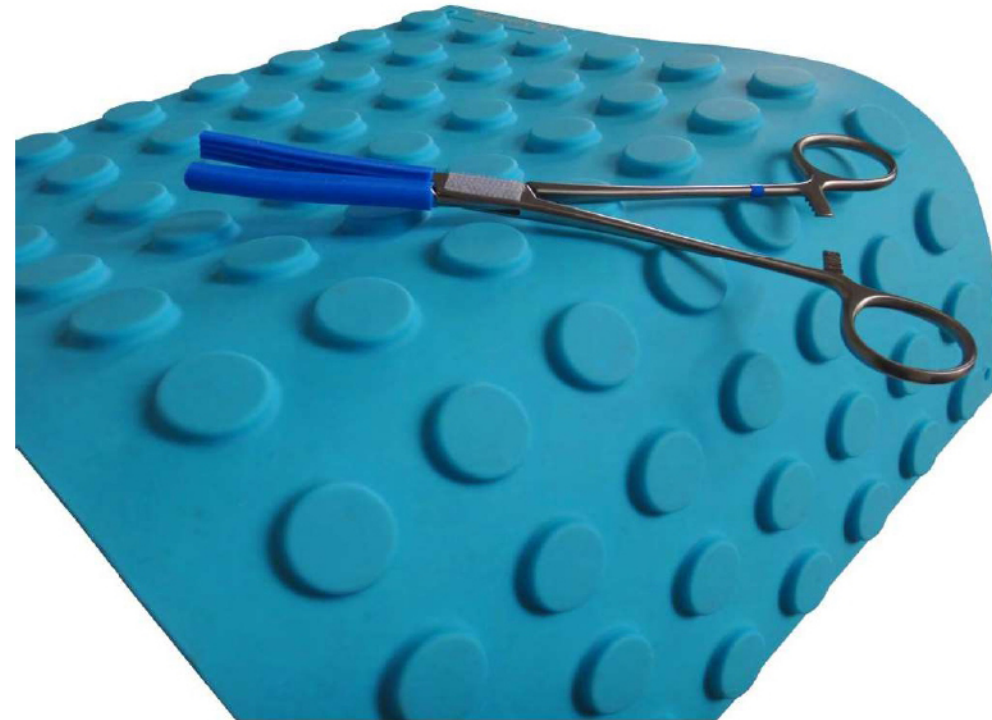

- Reusable
- Economical
- Satin Finish
- Ease of Threading
- Two Diameters: 3 mm and 4 mm
- Two Lengths: 14.5" and 18"

Catalog # KLP-3, 3 mm 14.5 inches long pencil nose, Part # 24001-02M

KPL-4, 4 mm 14.5 inches long pencil nose, Part # 24001-01M

KPL-4L, 4 mm 18 inches long pencil nose, Part # 24003-01M

Magnetic Mats

- **Raised Magnets hold instruments firmly in place while allowing easy grasping of instruments .**
- **Round Magnets to avoid silicone perforations**
- **Flexible and non slip backing drape conforms to any surface shape**
- **Size 15 " X 12 " (30 X 38 cm)**

Disposable Hernia Mesh Stapler

Intended Use:

The Disposable Hernia Mesh Stapler has application in endoscopic surgery procedures for fixation of prosthetic material and approximation of tissue in various surgical specialties, such as the repair of hernial defects.

NIKO Laparoscopic Electrode

Disposable Electric Coagulating Cutter

Laparoscopic Hook Electrode Types

- ❖ L- Hook Electrode
- ❖ J- Hook Electrode
- ❖ Spatula Electrode
- ❖ Ball Electrodes
- ❖ L Hook with Suction triumph

Suction Irrigation with Trumpt

- Unblocked channel with good flowing performance.
- Transparent hand piece, unobstructed visualization.
- Stainless steel probe with position function, easy to fix and draw out.
- Ergonomically designed hand piece can be easily operated by either hand.
- Clear channel, consistent diameter with self-flush function.
- Smoke evacuation and filtration, smoke flow rate is adjustable.
- Flip designed rear port for easy access inside chamber , can be operated by one hand, quick close and reduce air leakage.

NIKO ViClear

Continuous Suction and Irrigation during Surgery

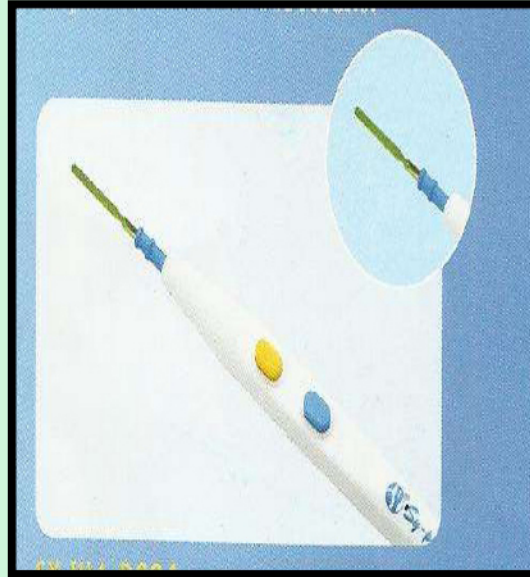

- Improve wound cleanness
- Reduce probability of surgical site infection (SSI).
- Tissue debris, juices , fluid, Tumor Necrosis,& Narcotic tissues
- Manage bleeding faster

ULNA HEAD

- Painless rotation (endo-exo) of the underarm
- Restoration of the strength of the arm
- Prevents from instability
- Prevents from a radio-ulna head impingement
- Prevents from an impaction syndrom

RADIAL HEAD

1. Anatomical design (head and head size) gives an excellent functioning of the joint.
 - 7° Angled head
 - Natural rotation stable form of peg and radial head
 - 3 Head sizes
 - Axial correct position possible
 - Choice of two resection possibilities of the natural radial head
2. High primary stability due to
 - Long peg that fits in the bone shaft optimally
 - Horizontal rims for more contact surface to the bone
 - Vertical rims for rotation stability
 - 4 Different peg diameters (5.7, 6.5, 7.2 and 8.0 mm)
3. Optimal function and short recovery time

Surgical Glue for Onco Surgery Tissue Gluing

Adhesive Tube Content (g)
15

The cardiac surgical glue is a two-component glue consisting of an adhesive component (Gelatin and Resorcinol) and a polymerisation component (Formaldehyde and Glutaraldehyde).

This glue does not contain any blood derivatives and has been developed especially for the use in cardiac and vascular surgery. The glue components are directly mixed at the application site. Providing a specially designed applicator – with Luer-Lock connector – enables an exact application of the polymerisation agent. The polymerisation happens in only 120 seconds.

Typical Applications

- Dissection of vessel layers
- Suture line support with acute aortic dissections
- Support of suture lines during cardiac and vascular procedures

The surgical glue will be delivered ready to use and sterile including the following components in each pack:

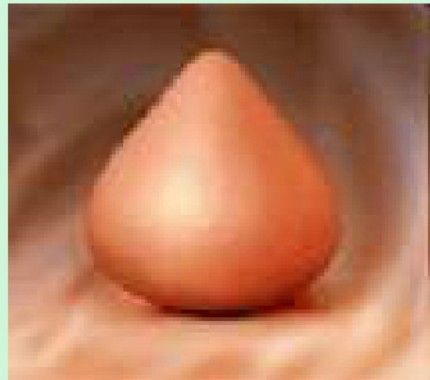

- 1 Flexible tube containing the Gelatin Resorcinol mixture
- 1 Opaque glass bottle containing the formaldehyde/glutaraldehyde polymerisation agent
- 1 Luer-Lock single-use syringe, 5 ml
- 1 Applicator with Luer-Lock connector for drawing up and applying the polymerisation agent

DIFFERENT SHAPES OF BREAST FORMS

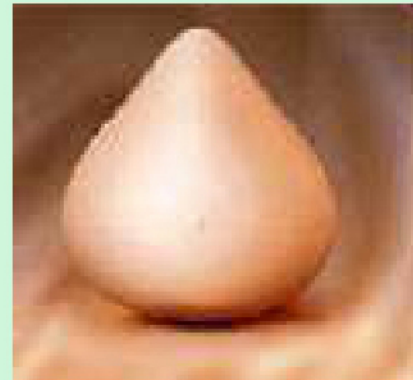

PEARL

ABC LIGHTWEIGHT TRIANGLE

ABC MASSAGE FORM

SILICONE BREAST FORMS:

Most women choose to wear an external breast form after surgery because it is comfortable and natural looking way to restore symmetry without further surgery. Silicone gels can be formulated to imitate the softness and response Of natural breast tissue. Also silicone gel is nearly the same density as the natural breast. That means a breast form of the same size would be nearly the Same weight as a remaining breast.

Custom Breast Prosthesis

Do you know
custom-made breast prostheses
are now available for women

Made with natural ingredients

Product Features

Ingredients: Water, Decyl Glucoside, Cocamidopropyl Betaine, Glycerine Isoamyl Laurate, Polyglyceryl-6 Caprylate, Polyglyceryl-4 Caprate, Acacia Senegal Gum, Sodium Levulinate Xanthan Gum, Lavandula Angustifolia (Lavender) Oil, Sodium Anisate Lactic Acid, Cocos Nucifera (Coconut) Oil, Tocopherol, Tocotrienols, Sodium Phylate.

FOR FRAGILE HAIR & SENSITIVE SCALP

COMPLETE NATURAL SOLUTION

The PAXMAN Scalp Cooling System-CANCARE

Stop Hair loss Chemotherapy Radiation therapy

THE PAXMAN
SCALP COOLING
SYSTEM

FDA CLEARED.

The Paxman Scalp Cooling System is the world-leading hair loss prevention system for chemotherapy patients. It has been used by over 100,000 patients in 35 countries and is responsible for helping patients to keep their hair and retain a feeling of normality during chemotherapy. This scalp cooling system is now available for the first time in Malaysia and is giving Malaysians a choice against hair loss during cancer treatment. There is no more grieving of hair loss during cancer treatment. The PAXMAN Scalp Cooling System has been indicated clinically by FDA to reduce the likelihood of chemotherapy-induced hair loss in cancer patients with solid tumours such as: breast, ovarian, colorectal, bowel and prostate cancer.

Hair loss is consistently ranked in the top 3 most distressing cancer chemotherapy side effects.

Hair loss is a well-known side effect of many chemotherapy regimens, with many men and women reporting it to be the most traumatic and intense aspect of their cancer treatment. It is estimated that 1 out of 12 patients actually refuse chemotherapy because they do not want to lose their hair. The Paxman Cooling System (also known as the 'cold cap') alleviates the damage caused to the hair follicles by chemotherapy. It works by reducing the temperature of the scalp by a few degrees immediately before, during and after the administration of chemotherapy. Liquid coolant passes through the cap extracting heat from the patient's scalp, ensuring the scalp remains at an even, constant temperature to minimize hair loss.

SANKOM –US FDA ACTIVE TARGETED COMPRESSION

Filshie Tubal Ligation System™ - Cooper Surgical

Quick, Easy and Effective Permanent Surgical Sterilization - Female Sterilization

The Filshie Tubal Ligation System

Offers Physicians and Patients the Greatest Versatility in Female Sterilization. This minimally invasive procedure can be effectively utilized in an interval laparoscopic approach, at the time of caesarean delivery, or after vaginal birth via minilaparotomy. The Filshie Tubal Ligation System requires minimal procedure time because there is no tying, Transection or cauterization of the fallopian tubes – reducing the risk of damage to adjacent organs caused by electrocautery, and significantly lowering the risk of bleeding associated with other ligation methods that require tube transection.

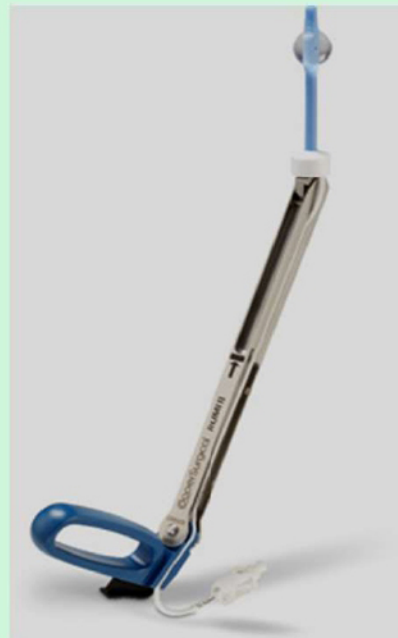

RUMI® II UTERINE MANIPULATION DEVICES- COOPER SURGICAL

Uterine Manipulation Providing Enhanced - Visualization and Control

The articulating RUMI II System provides safe and highly effective uterine manipulation for any laparoscopic or robotic pelvic surgery. Surgeons will experience superior visibility and control of the uterus, and greater access to pelvic anatomy.

The RUMI® II System provides highly effective, safer uterine manipulation for any laparoscopic or robotic pelvic surgery. Surgeons will experience superior exposure and control of the uterus, and greater access to pelvic anatomy. The RUMI II reusable manipulator handle features a 2-inch longer shaft than the original RUMI, and allows for full 140 degree articulation at the cervix and remarkable visibility. For added control and safety, the handle's frictionless locking mechanism maintains tip orientation and stable uterine positioning during dissection.

INCA Infant Nasal CPAP Assembly – Cooper Surgical

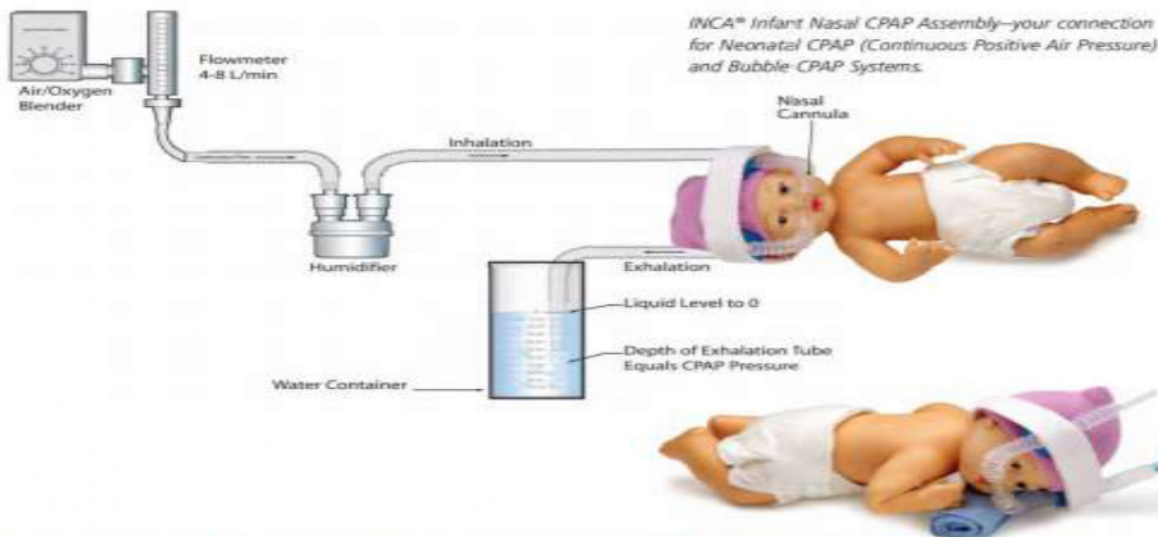

INCA Infant Nasal CPAP Assembly –

INCA Infant Nasal CPAP Assembly is the most respected Continuous Positive Airway Pressure (CPAP) device among clinicians. INCA affords all the benefits of CPAP/Bubble CPAP for newborns in your care.

Features enhanced precision fit for neonates:

- ❖ Five anatomically proportional nasal cannula sizes for neonates
- ❖ Clear, extra-soft tubing provides custom shaping and maximal stability
- ❖ Chin strap is available to help prevent air leakage around the mouth
- ❖ Available in Complete and Replacement Sets
- ❖* Accessories - Consists of a nasal cannula, two lengths of Stay-Flex tubing, two tubing adapters, one in-line "T" pressure adapter, a knit cap with hook/ loop strap, two foam blocks and a hook/loop chin strap. One INCA Sizing Gauge is included in every box of five sets.

Simple Bubble CPAP Setup and Components

INCA Infant Nasal CPAP Assembly Ordering Information

Trans Warmer Infant Transport Mattress Cooper Surgical

Trans Warmer Infant Transport Mattress -is a gel-filled, disposable thermal mattress designed for use in all cases when cold stress is a concern. Patented Warm Gel heats quickly to minimize the risk of hypothermia.

Safe & Convenient

- Non-toxic food-grade gel
- Single-patient use minimizes risk of infection
- Portable heat source requires no electricity Reliable
- Reaches maximum temperature in less than 60 seconds
- Trigger disc ensures activation when needed Clinically Proven
- Reduces hypothermia risk in neonates
- Maintains 104° F for up to two hours The Unique Benefits of Warm Gel
- Better heat distribution increases blood flow
- Optimizes temperature maintenance in neonates and small paediatric patients
- Absorbs vibration during infant transport
- Patented gel and soft non-woven surface gently conform to patient's shape for better nesting
- Reduces the risk of cold stress

Features & Benefits Minimizes the risk of cold stress

- Patented Warm Gel® mattress - Nests infant, absorbing vibration during transport
- Consistent, uniform heat distribution - Prevents the complications of cold stress
- Heats in less than 60 seconds - Provides rapid thermal support
- Easy to activate - Simple, no inner bag to rupture

MENSTUAL PAIN THERAPY

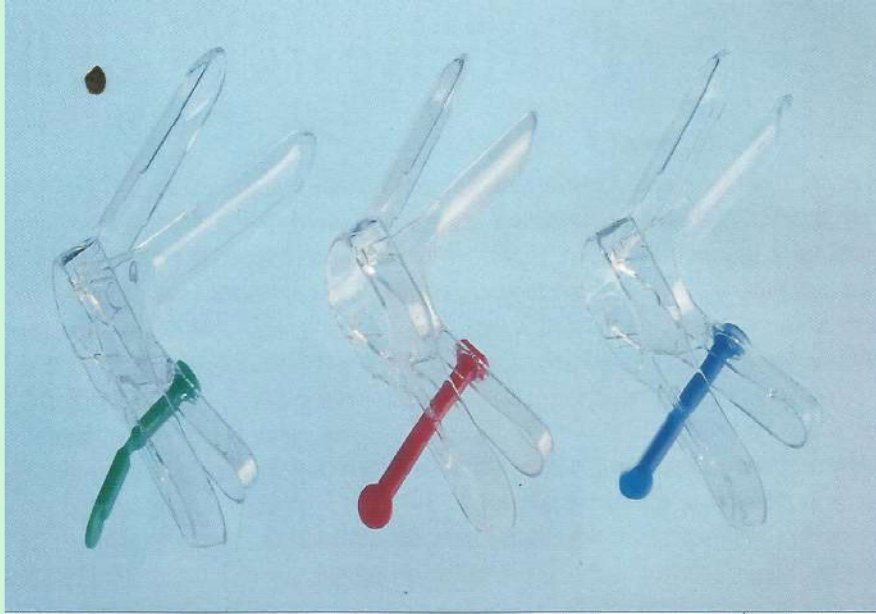

Odor-Free

- Air-activated
- Stays flexible

- For Instant Pain Relief
- Easy to apply
- Stays for 24 Hrs
- No Residue Left

VAGINAL SPECULUM

Without Light

Vaginal speculum with central key locking system - For dilation of the vaginal canal to expose the uterus neck. It allows the adjustment of the vaginal opening by positioning the blades and locking the central key. The smooth surface and rounded edges aid a comfortable introduction.

Comfortable handle shape provides sufficient grip during the operations of insertion/extraction. Material high transparency allows vaginal walls inspection.

The central key can be bent down for an easier introduction of cumbersome instruments.

With Light

ENDO BAGS

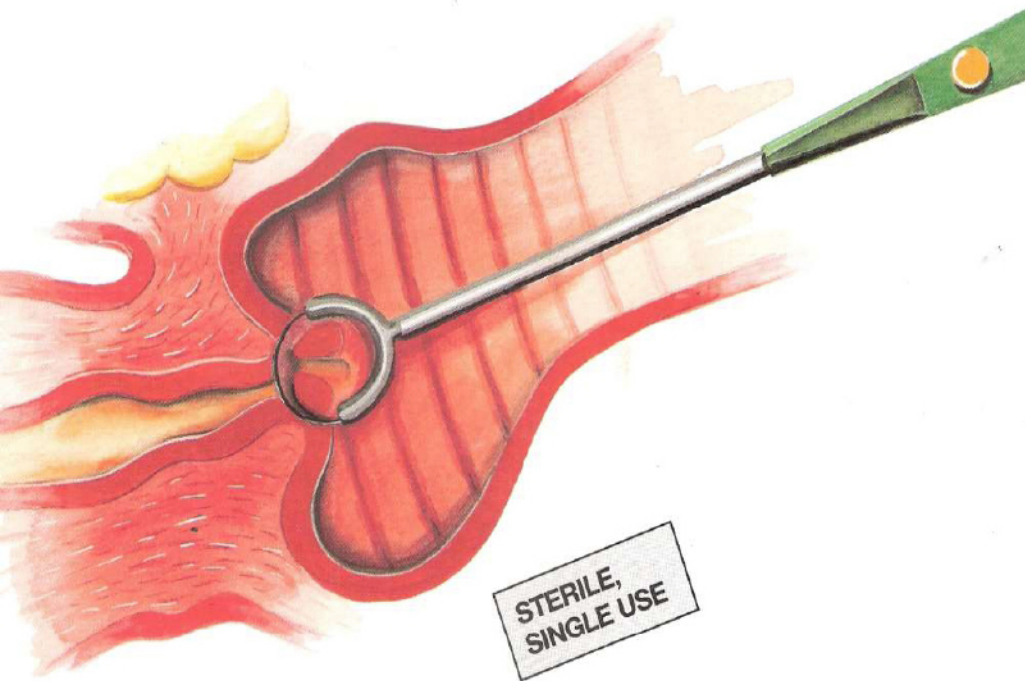

Endo Bag (Easy Bag) with Introducer
Size 3*6 " / 5*7 " FEP157080

Auto Retrieval Endobag

- Active Channel 600ml(MEBC600)
- Auto Retrieval 400ml MEBD400)
- Auto Retrieval 200ml (MEBD200)

Niko Loop Niko Colposcopy Loops Electrode/Contization Electrode

Electrodes for
Electrosurgical Procedures

Contization Electrode

Ideal for:

- LLETZ procedures
(Large Loop Excision of the Transformation Zone)
- LEEP procedures
(Loop Electrosurgical Excision Procedure)

Both U-Bar and T-Bar type available together with a long ball electrode for coagulation. All with insulated shaft minimizing the risk of tissue damage. The electrodes are compatible with all US standard 2,35 mm electrosurgical pencils.

- Facilitates treatment of patients on outpatient basis
- Provides precise tissue margins for histological examination
- Less bleeding and patient discomfort
- No risk of cross contamination
- LLETZ and LEEP procedures require minimal training only and no expensive equipment

The Niko Loop Electrodes are the ideal products for the treatment of:

- Cervical, Vulva, Vaginal, Penile and Perianal diseases.

For these diseases Niko Loop Electrodes provide you with a simple and reliable solution which is now considered the most efficient and cost effective treatment option available.

THERMAL ABLATION SYSTEM

Medgyn MTA-100 Thermal Ablation System

Product Information

018003 MedGyn MTA-100 Thermal Ablation System

Description

In 2019, WHO issued new guidelines for the use of thermal ablation for cervical pre-cancer lesions. While they continue to recommend cryotherapy, the WHO has offered thermal ablation as an alternative method of treatment for specific environments. MedGyn is pleased to announce its latest device: MedGyn's MTA-100 Thermal Ablation System. The device is a portable, lightweight device for the treatment of pre-cancerous lesions optimized for 20, 40, or 60 second intervals of treatment.

Product Features

Optimized to offer 20, 40, or 60 second intervals for procedure

Bright LED lights for clear viewing of cervical area

Digital display to detailing temperature at all stages of procedure

Durable and ergonomic handle for ease of use

25mm tip available offering larger treatment area (5 types of interchangeable gold alloy tips)

Sound and light activation for beginning and end of procedure

Patent Pending

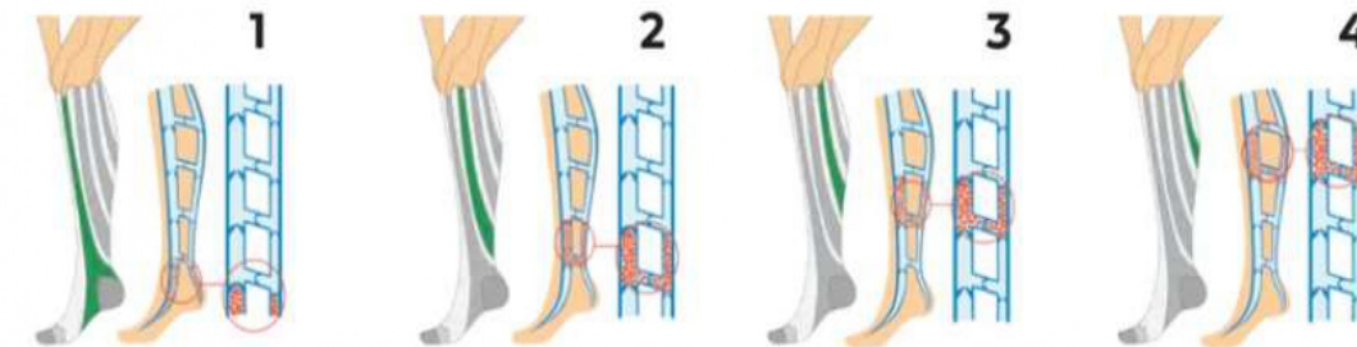

SANKOM –US FDA ACTIVE TARGETED COMPRESSION

Instant relief for heavy, tired legs.
UNIQUE PATENTED TECHNOLOGY
CLINICALLY PROVEN TO:

- ✓ IMPROVES BLOOD CIRCULATION
- ✓ REDUCE SWELLING AND HEAVINESS
- ✓ HELP PREVENT VARICOSE VEINS

Discover the MOST comfortable compression socks in the world! With targeted anatomical compression and padded non-restrictive soft heels & toes, you can wear the SANKOM Patent Socks all day, whenever your legs feel heavy, swollen or tired. Perfect for travel, sedentary jobs, long days, as well as men and women prone to poor blood circulation.

Compression Stockings – On Prescription after Surgery

Anti embolism Stockings – For hospitalized patients who admitted from Long time
